

■ SERVICES & PRICES

Sambhav Jain

EruditeCoder / github.com/EruditeCoder108

Independent developer. I design and build *websites, apps, automations and AI tools* for businesses — priced plainly, delivered on time, and yours to keep.

BASED IN

Jabalpur, Madhya Pradesh

WORKS WITH

Businesses across India

PRICES VALID UNTIL

31 March 2027

IN THIS RATE CARD

01	Websites & landing pages	p. 02
02	Apps & custom software	p. 03
03	Automation & AI	p. 03
04	Design, IoT & ongoing care	p. 04
05	Terms & how we work	p. 05

All prices are in Indian Rupees. Fixed prices are marked as such; everything else is a starting price, confirmed in writing after a short call about your project.

01 Websites & landing pages

Two fixed-price landing pages for businesses that need to be found and contacted, and full websites for businesses that need to run part of their work online.

LANDING PAGES

FIXED PRICE

Starter

₹5,000

For being found and contacted.

~5 WORKING DAYS

2 REVISIONS

- One page, up to six sections
- Designed for phones first, sharp on every screen
- WhatsApp, call and social media buttons
- Contact form that reaches your email
- Google Maps location
- Basic SEO and link previews for sharing
- Hosting set up on your domain

Business

₹8,000

For businesses that live on enquiries.

~7 WORKING DAYS

3 REVISIONS

Everything in Starter, plus —

- Every enquiry saved to a Google Sheet
- Instant WhatsApp and email alert for each lead
- Document and file uploads from customers
- Booking and enquiry forms
- Visitor analytics
- Edit your own text and photos, anytime

WEBSITES WITH A BACKEND

STARTING PRICES

Small website

FROM

₹15,000

2–3 WEEKS

Up to 5 pages with an admin panel to manage one kind of content — products, menu, gallery or listings. Database and secure admin login included.

Online store

FROM

₹20,000

2–4 WEEKS

Product catalogue, cart and Razorpay checkout, with an order dashboard for you. Your first products loaded and ready to sell.

Medium website

FROM

₹25,000

3–5 WEEKS

Up to 10 pages with customer accounts, bookings or orders, online payments through Razorpay, and automatic email notifications.

Large & custom builds

FROM

₹40,000

TIMELINE PER SCOPE

Portals, multi-role dashboards, integrations with your existing tools — anything beyond the above. Scoped together on a call, then quoted in writing.

HOW “FROM” WORKS

The starting price covers what is described. Your final price depends on the pages and features you need, and is fixed in writing before any work begins.

PAID SEPARATELY, AT ACTUAL COST

Domain name, paid hosting if your site needs it, and payment gateway fees. You own every account, in your own name.

02 Apps & custom software

Android apps your customers keep on their phones, built on systems you own.

ANDROID APPS

STARTING PRICES

Android app

FROM

₹20,000

3–4 WEEKS

A clean app for your catalogue, menu, services or content — or your existing website turned into a proper app. Published on the Play Store.

Android app with backend

FROM

₹40,000

5–8 WEEKS

Customer logins, orders or bookings, push notifications, and an admin dashboard to run it all from.

03 Automation & AI

The repetitive parts of running a business, handled by software — so enquiries, orders and follow-ups never slip.

WORKFLOWS, WHATSAPP & CHATBOTS

STARTING PRICES

Workflow automation

FROM

₹4,000

PER WORKFLOW

Connects the tools you already use so routine work runs by itself — forms, Google Sheets, WhatsApp, email, invoices and reminders. Built on n8n.

WhatsApp Business setup

FROM

₹10,000

1–2 WEEKS

The official WhatsApp Business API with auto-replies, order and booking confirmations, and instant alerts to your team.

AI chatbot

FROM

₹12,000

1–2 WEEKS

An assistant trained on your prices, services and FAQs that answers customers on your website or WhatsApp, at any hour.

EXAMPLE — THIS IS ONE WORKFLOW

Customer fills a form → Saved to Sheet → WhatsApp alert to you → Follow-up email

RUNNING COSTS, PAID DIRECTLY

WhatsApp message charges from Meta, AI usage fees and the Play Store developer account are billed to your own accounts, at actual cost.

WHAT COUNTS AS ONE WORKFLOW

One trigger and the chain of steps it sets off, like the example above. Larger automation systems are quoted as a project.

04 Design, IoT & ongoing care

A look your customers remember, hardware when software alone isn't enough, and monthly care that keeps everything running after launch.

DESIGN & BRANDING

FIXED PRICE

Logo

₹3,000

- Three initial concepts
- Two revision rounds
- Final files in PNG, SVG and PDF

Brand kit

₹7,000

- Logo included
- Colour palette and typefaces
- Business card design
- One-page brand guide

Social creatives

₹3,500 / 10 POSTS

- Pack of ten designed posts
- In your brand colours and fonts
- Sized for Instagram and WhatsApp

HARDWARE

COMPONENTS AT ACTUAL COST

IoT, smart devices & prototypes

Custom quote

Sensors, automation hardware and working prototypes — from a single device to a small batch. Components and hardware billed at actual cost.

AFTER A SCOPING CALL

ONGOING CARE

MONTHLY

Landing page care

₹1,000 /MO

For Starter and Business landing pages.

- Hosting and domain renewals handled
- Uptime monitoring
- Up to two small text or photo changes a month
- Priority support on WhatsApp

Website & app care

₹2,500 /MO

For websites, stores and apps.

Everything in Landing page care, plus —

- Regular backups
- Security and software updates
- Bug fixes
- Up to three hours of changes a month

CARE IS OPTIONAL

Every project is handed over in full, whether or not you choose a care plan. Plans run month to month.

BIGGER CHANGES

New pages, features or redesigns go beyond care and are quoted separately, at the same rates as this card.

05 Terms & how we work

Simple terms, agreed in writing before work begins, so both sides know exactly what to expect.

HOW A PROJECT RUNS

FOUR STEPS

01 Call A short call to understand what you need and what it should do for your business.	02 Quote A written quote with the scope, final price and timeline. Nothing starts until you agree.	03 Build Work begins on the advance. You see progress as it's built and give feedback along the way.	04 Launch Final payment, go-live, and a full handover of code, files and accounts.
--	---	---	---

TERMS

VALID UNTIL 31 MARCH 2027

01 Payment 50% in advance to begin, and 50% before go-live.	04 Revisions Included rounds are listed with each service. Each extra round is ₹500.
02 Ownership Code, designs and accounts are fully yours once the final payment is made.	05 Changes in scope Anything outside the agreed quote is priced separately before it's built.
03 Third-party costs Domain, hosting, Play Store, WhatsApp and AI fees are billed at actual cost, in your name.	06 Validity Prices on this card hold for projects agreed before 31 March 2027.

START A PROJECT

Tell me what you need.
I'll tell you what it costs.
